TECHNICAL SPECIFICATIONS

Dischi Brembo

Pur essendo un componente della moto apparentemente semplice, il disco freno richiede esperienza e tecnologia per la sua realizzazione, in quanto parte fondamentale di un sistema che, nonostante le forti sollecitazioni termomeccaniche, deve garantire sicurezza, affidabilità e prestazioni in tutte le condizioni d'utilizzo. Per queste ragioni vi consigliamo di controllare periodicamente lo stato dei vostri dischi e, quando necessario, provvedere alla loro sostituzione. Brembo, azienda leader nel campo degli impianti frenanti, offre una linea completa di dischi in grado di soddisfare qualsiasi necessità:

Dischi freno Serie Oro

Perfettamente intercambiabili ai dischi di serie, sono la scelta dei motociclisti che non vogliono rinunciare alla qualità Brembo.

Caratteristiche costruttive

Dischi freno "Flottanti"

Sono composti dalla fascia frenante in acciaio Inox utilizzato anche per le applicazioni dei dischi originali Brembo, collegata attraverso 10 nottolini di trascinamento alla campana realizzata in lega di alluminio, lavorata CNC e successivamente anodizzata. I dischi "flottanti" Brembo, in virtù dell'impiego di materiali di altissima qualità, forniscono prestazioni di assoluta eccellenza.

Dischi freno "Fissi"

Sono realizzati in acciaio Inox in un unico pezzo, secondo una linea progettuale e costruttiva che assicura un'esecuzione perfetta: le tolleranze strettissime imposte ed i cicli di lavorazione scelti garantiscono ai dischi "fissi" Brembo caratteristiche di planarità e concentricità che li pongono al top della scelta.

Nota: I **Serie Oro** seguono le caratteristiche costruttive dei dischi originali, quindi se la moto monta di serie un disco flottante anche il ricambio sarà così costruito. Per facilitare la scelta, le prime due cifre del codice identificano la tipologia del disco: 78 per i flottanti, 68 per i fissi.

Brembo Discs

It might appear to be one of the more simple parts on a motorcycle, but the brake disc requires considerable experience and technology to manufacture, given its role as a key component in a system exposed to strong thermo-mechanical stresses, yet expected to guarantee safety, reliability and performance under any operating conditions. With this in mind, we recommend that you check the state of your discs periodically, and be sure to replace them when necessary. Brembo, world-leading designer and manufacturer of brake systems, offers a comprehensive range of discs that will meet any and every need:

Serie Oro brake discs

100% interchangeable with standard discs, these are the choice of motorcyclists familiar with Brembo quality and willing to accept nothing less.

Features of construction

'Floating' brake discs

In this design, the disc proper is made of the same steel used for Brembo original equipment and connected by way of 10 drive pins to a hub flange cast from light aluminium, machined on CNC equipment and then anodized. Brembo 'floating' discs are manufactured from materials of the highest quality and deliver performance second to none.

'Fixed' discs

Fashioned in one piece from stainless steel, these are discs designed and constructed to produce a faultlessly engineered package: ultra-close manufacturing tolerances and selected machining cycles guarantee flatness and concentricity that will recommend Brembo 'fixed' discs to the most discerning of motorcyclists.

Note:

Serie Oro discs are made to the same design as their OE equivalent; accordingly, if the machine came with a floating disc, then the Gold Series replacement will also be a floating disc.

For easy identification, the first two digits of the part number indicate the type of disc: 78 for floating, 68 for fixed.

TECHNICAL SPECIFICATIONS

F

Disques Brembo

Bien que pouvant sembler un composant apparemment simple de la moto, le disque de frein exige expérience et technologie pour sa réalisation, puisqu'il s'agit d'une pièce fondamentale d'un système qui doit garantir, malgré de fortes contraintes thermodynamiques, la sécurité, la fiabilité et les performances dans toutes les conditions d'utilisation. C'est pour cette raison que nous vous conseillons de contrôler périodiquement l'état de vos disques et, si nécessaire, de les remplacer. Brembo, entreprise leader dans le domaine des systèmes de freinage, offre une gamme complète de disques en mesure de satisfaire toute nécessité :

Disques de frein Serie Oro

Pouvant remplacer parfaitement les disques de série, c'est le choix des les motocyclistes qui ne veulent pas renoncer à la qualité Brembo.

Caractéristiques de construction

Disques de frein « flottants »

Ils sont formés par une bande circulaire de freinage en acier inox également utilisé pour les disques Brembo originaux, reliée au moyen de 10 masselottes d'entraînement à la cloche réalisée en alliage d'aluminium, usinée sur une machine à CNC et ensuite anodisée. Du fait de l'emploi de matériaux de très haute qualité, les disques « flottants » Brembo fournissent des performances de premier plan.

Disques de frein « fixes »

Ils sont réalisés en acier inox d'une seule pièce, selon une ligne de conception et de construction qui assure une exécution parfaite : les tolérances très étroites imposées et les cycles d'usinage choisis garantissent aux disques « fixes » Brembo des caractéristiques de planéité et de concentricité qui en font le meilleur choix.

Note : les disques **Serie Oro** ont les mêmes caractéristiques de construction que les disques d'origine ; ainsi, si la moto est équipée de série d'un disque flottant, la pièce détachée sera elle aussi construite de cette manière.

Pour faciliter le choix, les deux premiers chiffres de la référence identifient le type de disque : 78 pour les disques flottants, 68 pour les disques fixes.

Brembo Bremsscheiben

Die Bremsscheiben eines Motorrads scheinen auf den ersten Blick einfache Komponenten zu sein; für deren Herstellung sind jedoch reichlich Erfahrung und technologische Versiertheit erforderlich, da sie die wesentlichen Bestandteile eines Systems sind, die angesichts der hohen thermomechanischen Belastungen Sicherheit, Zuverlässigkeit und Leistung unter jeder Fahrbetriebsbedingung garantieren müssen. Aus diesen Gründen empfiehlt es sich, regelmäßig den Zustand der Bremsscheiben zu kontrollieren und bei Bedarf deren Austausch zu veranlassen. Brembo, das führende Unternehmen im Bereich der Bremsanlagen für Motorräder, verfügt über ein in jeder Hinsicht komplettes Angebot an Bremsscheiben, die entsprechend ausgelegt sind, um jede Anforderung zu erfüllen:

Bremsscheiben Serie Oro

Für diese anstelle aller gängigen Serienmodelle montierbaren Bremsscheiben entscheiden sich diejenigen Motorradfahrer, die auf keinen Fall auf Brembo Qualität verzichten möchten.

Bautechnische Eigenschaften

„Schwimmend gelagerte“ Bremsscheiben

Diese Bremsscheiben bestehen aus einem Bremsband aus dem selben Edelstahl von den ursprünglichen Brembo Scheiben, das über 10 Mitnehmerbolzen mit dem Innenteil aus CNC-bearbeiteter und anschließend eloxierter Aluminiumlegierung verbunden ist. Die „schwimmend gelagerten“ Bremsscheiben von Brembo bieten dank der Fertigung mit Materialien höchster Qualität absolute Spitzenleistungen.

„Einteilige“ Bremsscheiben

Diese in einem Stück gefertigten Bremsscheiben aus Edelstahl werden nach einem Verfahren hergestellt, das an Perfection seinesgleichen sucht: Die bewusst eng

gehaltenen Toleranzen und die ausgewählten Bearbeitungszyklen garantieren den „einteiligen“ Brembo Bremsscheiben nahezu unvergleichliche Ebenheits- und Konzentritätseigenschaften.

Hinweis: Die Modelle der **Serie Oro** entsprechen bautechnisch den Original-Bremsscheiben, d.h., ist das Motorrad serienmäßig mit einer schwimmend gelagerten Bremsscheibe versehen, wird das Ersatzteil analog dazu hergestellt. Um die Auswahl zu erleichtern, geben die ersten zwei Ziffern des Codes den Bremsscheibentyp an: 78 für schwimmend gelagerte bzw. 68 für einteilige Bremsscheiben.

TECHNICAL SPECIFICATIONS

Discos Brembo

Más allá de su aparente sencillez, un disco de freno requiere experiencia y tecnología en su realización, por ser un componente fundamental de un sistema sujeto a considerables esfuerzos termomecánicos que debe garantizar seguridad, fiabilidad y altas prestaciones en cualquier condición de uso. Por estas razones, recomendamos controlar periódicamente el estado de los discos y sustituirlos cuando sea necesario. Brembo, empresa líder en el sector de los sistemas de freno, ofrece una línea completa de discos capaces de responder a cualquier necesidad:

Discos de freno Serie Oro

Perfectamente intercambiables con los discos de serie, son la elección de los motociclistas que no están dispuestos a renunciar a la calidad Brembo.

Características constructivas

Discos de freno “Flotantes”

Compuestos por una banda de freno del mismo acero inoxidable utilizado para las aplicaciones de discos originales Brembo, conectada a través de 10 pasadores a la campana, realizada e aleación de aluminio mecanizada por CNC y posteriormente anodizada. Gracias al empleo de materiales de altísima calidad en su fabricación, los discos “flotantes” Brembo aseguran prestaciones de absoluta excelencia.

Discos de freno “Fijos”

Realizados en un único bloque macizo de acero inoxidable, con una línea de proyecto y construcción que asegura una ejecución perfecta: las estrictas tolerancias y los ciclos de mecanizado elegidos garantizan a los discos “fijos” Brembo características de planaridad y concentrividad que los colocan en la cumbre de la gama.

Nota: Los **Serie Oro** siguen las características constructivas de los discos originales. Por lo tanto, si la moto se suministra de serie con un disco flotante, el repuesto estará construido de la misma manera.

Para facilitar la elección, las primeras dos cifras del código identifican el tipo de disco: 78 en los flotantes, 68 en los fijos.
